ABSTRACT

Thirty tables are presented, in both summary form and for individual institutions, giving enrollment by age category for students in New Jersey colleges and universities in the fall of both 1977 and 1978. Tables include: headcounts for undergraduate students, percent distribution of undergraduates, and headcount and percent distribution for graduate students. The same data are also presented by institution type and full- or part-time enrollments. The age categories used are: 17 years and under, 18 to 20, 21 to 24, 25 to 34, 35 to 44, 45 to 54, 55 to 64, 65 and over, and unknown. Data are drawn from the Higher Education General Information Survey on student characteristics. No analysis is given. (MSE)

RESEARCH NOTES

The following statistical compilations on the age distribution of students enrolled in New Jersey colleges and universities were derived from the annual N.J. HEGIS survey on Student Characteristics, Fall 1977 and Fall 1978 (N.J. HEGIS Forms #30477 and #30478).

The institutional data tables contain the Fall 1978 statistics only. However, identical tables on Fall 1977 statistics were used to prepare the Summary Tables that include both 1977 and 1978 sector data. Those Fall 1977 compilations are not published in this report, but are available in the D.H.E. Office of Research.

The tables in this report contain data for every New Jersey college; however, the Office of Research did not receive 1978 information from Drew University, so their 1977 data were entered.

Note (on average age calculations):

On the percent distribution tables of students enrolled by age category, the Office of Research calculated the average age for each college. These average ages were calculated from the aggregate data reported by each institution, not by individual student data available at the colleges.
